key ingredients

Polylactic Acid, Silica and Sodium Bicarbonate: a fine mineral powder blend that polishes away dead skin cells to help minimize fine lines and improve the overall texture of skin. Removes excess cells that impede penetration of active ingredients.

Lactic Acid and Salicylic Acid: alpha and beta hydroxy acids that stimulate exfoliation of cells, leaving a smoother skin surface.

Retinol (Vitamin A), Tocopherol (Vitamin E) and Tetrahexyldecyl Ascorbate (Vitamin C): pure Vitamin A (stable in this anhydrous formula) helps reverse the signs of aging by normalizing cells and stimulating new collagen formation while gently exfoliating. Vitamin E helps smooth skin while a stable form of Vitamin C stimulates skin strengthening collagen.

Opuntia Ficus Indica (Prickly Pear Cactus) Flower: boosts activity of skin's natural desquamation enzymes that are responsible for breaking desmosomal cell attachments.

Camellia Sinensis (White Tea) Leaf: polyphenols protect skin from ROS while inhibiting collagen-degrading MMPs and the formation of AGEs.
